A+++

This man and his young daughter have created a masterpiece.

Very accessible and charming. I like it more than Call Of Duty and Fallout.. Pretty good game for the price :) more at the summer price steam. If u like game like Dungeon Master its for u. Graphic are pretty good and we have a good variety of skill. Haha funny stuff, they should make more!!!. It's needlessly maze like, a bunch of dead ends that really add nothing to the game. It's too easy, just paralyze every boss with the MC once you hit level 6 or so. Save often especailly one you get to the ultima gate as you have a chance of getting stuck on the islands when you're jumping across the lava, and since the interract points are at the end there is no way to get off if you do get stuck.. These guys work hard and have proved a lot of people wrong, including myself.

Edit: Seriously? mostly negative for a game thats updated to this extent? i bet you lot are the kind to take a free key to rate up asset flip games? point is the people down voting this game are either children or morons. developer has clearly worked and still is working hard on a game he prob hasn't made any money from.. This is a quick ninja platforming game. It's not bad but it's not that complex. Keyboard controls work just fine and snappy.

<https://www.youtube.com/watch?v=5qUoVRSLWd8>. I just started playing this little gem and I already had tons of fun. Many options to expand your pizzeria and you even need some brains to figure out how much stock to keep at hand and how to price your pizzas. Much deeper than the childish look it might have on first look. And there are anthro characters. :D Also I'm really starting to want to know what happens in the story. :) Great!

Challenging platformer with a unique twist.. WHAT IS THIS???. The game tries to rotate you automatically every time you teleport. This means you have to fix your position every time you move. It's infuriating. Maybe it works in 180 degree seated play, but for standing or roomscale when I'm perfectly capable of moving my real legs, trying to help me out is too obnoxious to ignore.. This game is quite simple; an open world with different layouts, abandoned buildings, ruins, forests and even in a sandstorm its fun to play with the various weapons, a pistol, rocket launchers, mines, automatic rifles, but its all very basic, needle has to say, the game runs virtually on any PC, unless you have a bad connection this game will work with no problems in multiplayer. They managed to implement a decent fire/hit system.

This is a game to be played with at least two or more players, or feel free to venture in every layout though there is not much to discover beside finding all the different weapons and other drops.

Simple, effective, recommended to all with a smile.

An island full of spooky skeletons | One Boomerang Boi

Play and find out..... I've been playing for a few days and mostly enjoying it. It reminds me a bit of playing the Paper Mario games (humor-wise). Also very much like playing a healer in an MMO. A lot of fun here. Only annoyance is the slow walk speed in the world - where are my pokemon game sneakers (run)? Definitely, recommend this one.. I have always identified as a sperm, so I feel like this game is what lets me finally express myself and is what has helped me come out has transpermic.
